Re: Option 2 Increased Severity Payments

Dear Claimant or Attorney of Record:

Our records show that you accepted an Option 2 Disease payment from the Settlement Facility-Dow Corning Trust (SF-DCT). Claimants who received a Disease Option 2 payment and who develop a Disease Option 2 condition that has a higher payment amount than your original condition are eligible to apply for an additional payment. Such additional payment is called an Increased Severity Payment under the Dow Corning Plan. For further information and answers to any questions you may have regarding Increased Severity please see Increased Severity Frequently Asked Questions on our website at www.sfdct.com.

If you have a condition that meets the Plan criteria for an Increased Severity review, you may file a claim at any time before the final filing deadline of June 2, 2019. At this time, the Court has not yet approved the distribution of Increased Severity Payments. However, if Increased Severity Payments are approved by the Court, claims will be reviewed in the order that they were received. The Facility is now receiving and reviewing Increased Severity claims. If you have a condition that meets Plan criteria for an Increased Severity Payment, you are encouraged to file a claim now to assure your place in line.

It is important that you keep your address updated with the SF-DCT. If you do not inform the SFDCT of any change in address, the SFDCT will not be able to issue any payments to you.

If you have any questions you may contact Claims Assistance at www.sfdct.com or 866-874-6099 or via email at info@sfdct.com.

Sincerely,

Settlement Facility – Dow Corning Trust
